FIRST FLOOR PLAN

SECOND FLOOR PLAN

THIS is the house that spells h-o-m-e for every member of the family. An American Colonial type of house, it is graceful, attractive and, as designed, is as comfortable as an old slipper. As this house says "hello" to the visitor, immediately one sees—and admires—the clever exterior of part brick veneer and part clapboard. The ruddiness of the brick is in mellow contrast with the gleaming purity of the clapboards. Shading down upon these wall surfaces, is the soft, green roof of asphalt shingles.

Alvin S. Krug, a missionary with the South China boat mission, visited friends here this week and was a speaker at Mt. Hermon school.

Capt. George Davis of Highland Ave., who is stationed at Ft. Slocum, N. Y. spent last week-end here.

Mr. and Mrs. Edward Fairbank spent last week-end on a visit

with relatives in New Jersey.

Mrs. Catchpool, housemother of the local hostel, reports that last week there were 107 overnights by groups of young people.

a harmonious blend with the red of the bricks and the white of the siding.

As one comes closer, there is a twinkle of light from unobtrusive and attractive basement windows. They are not ordinary basement windows. These are rippling-surfaced panels of hollow glass blocks agleam with the natural light which is flooding through them into the cellar.

Now there is the front door, sheltered by a sturdy, charming porch which invites the visitor to ring the doorbell and, at the same time, shields him from the weather. Within the house there are six rooms, unusually large for the moderate floor plan of less than 25 x 28 feet.

There are three rooms on the first floor, living room, dining room and kitchen, and several ideally-located closets. Also, there is the luxury feature of a first floor lavatory, which takes advantage of the usefulness of Insulux glass blocks to bring in natural light and retain all privacy.

On the second floor there are three bedrooms and, again, plenty of ideally located closets. And the second floor bathroom is so located as to be convenient to every room. Another second floor

feature is a deck which opens off one of the bedrooms and has an attractive railing about it.

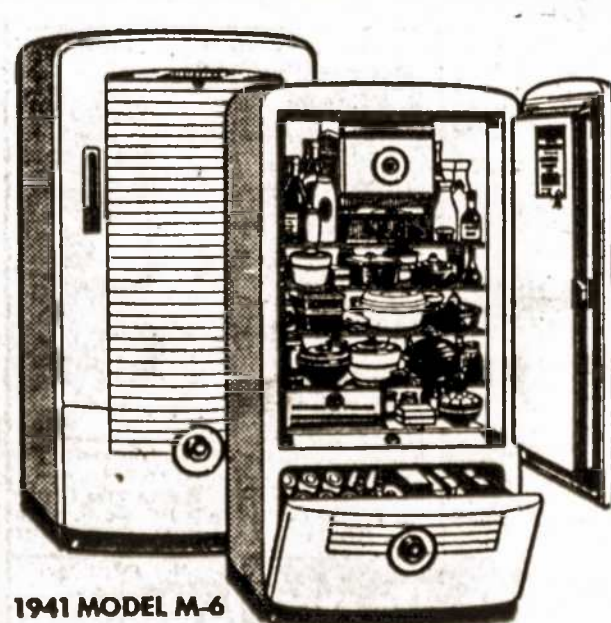

Fire-protecting the house is a colorful roof of asphalt shingles—husky, long-lived roof shingles with colors as steadfast as that of the glowing red bricks of the chimney and front wall.

One of the unusual features of the house is the compactness of the plan. The architect, Randolph Evar, who designed it for the Monks' Small House Club, 140 Nassau Street, New York, makes full use of every available inch.

'You Wouldn't Think  
that shabby old house  
could be so Charming  
Inside!'

Is that what visitors say about your home? Is it the one house in the block which one wouldn't suspect of being occupied by people of taste?

Inside the house is where you live. It is you. But the outside is important, too. Keeping the outside of your house attractively painted bespeaks the character of the folks who live inside as well as the taste with which the interior is furnished.

You may not care what people think but you can't afford to hurt the neighborhood in which you have an investment.

Periodic repainting not only enhances the appearance of your house (it adds much more to the value than the cost of repainting) but it helps to maintain the value standards of the entire neighborhood and prevents actual physical depreciation.

If your house needs painting now it will cost you more money to wait until spring—probably much more than the interest on the money you don't want to tie up over the winter.

### Plan A Dedication Of Anderson Chapel

At the spring meeting of the Federation of Church Brotherhoods, held recently in Greenfield, attended by many from this town, plans were announced for the dedication of the Memorial chapel in memory of the late Rev. William S. Anderson, at Lake Wiyaka, which he founded and loved so well.

The outdoor chapel will have a platform and pulpit of the native stone, gray granite and seats will

be of wood. It will be located about 40 feet from the shore of the lake on an elevation that forms a natural amphitheatre. About 1,000 feet from the camp tents on the southwest shore of the lake, the chapel will be surrounded by trees. The dedication will take place on Sunday, June 29. Arrangements will be made to insure a large attendance of the members and friends of the local Brotherhood.
